FURTHER RECOVERY
IN STOCK MARKET

Stock Market Closed Strong
in Spite of Profit Tak-
ing.

NEW YORK, March 12.—Influenced mainly by the further rise of British exchange, which proved only temporary, the stock market yesterday made many noteworthy accessions to its recent general and expansive recovery.

Domestic monetary conditions were unchanged, call money being freely offered per cent, with very few offerings of time funds. Bankers seem hopeful that no appreciable tightening of rates would attend impending heavy income tax payments but advised against extravagant stock market operations.

Except for a perceptible diminution of business in the later dealings, the break in exchange quoted no very pronounced effect on external values. Reactions of 2 to 6 points were largely regained at the finish, although profit taking was evident. Sales amounted to 435,000 shares.

Trading in bonds was light, but the tone, especially of speculative rails, was strong. Liberty issues eased with firmness among international. Sales (par value) were \$10,775,000. Old U. S. bonds were unchanged on call.

Pittsburgh

PITTSBURGH, March 12.—Nearly 95,000 shares changed hands on the Pittsburgh exchange yesterday, but of this total 80,300 shares consisted of Pittsburgh-Jerome Copper, which was offered freely all day at 9c to 10c. There was a revival of activity in Arkansas Gas, which at one time advanced to 32½, but reacted to 31½ and closed at 31½. Marland Refining was also more active and ruled firm at 5½ to 6½. Gulf Oil was steady at 52 to 52½. Ohio Fuel Supply declined from 52½ to 51, and Barnsdall and Lone Star were slightly lower at the close.

In the miscellaneous list the largest gain was 6¼ points in Le Bell Iron, which sold at 115. Westinghouse Air Brake was 1¼ higher at 11½, and Electric closed ¾ higher at 53. Glass stocks were quiet and unchanged. Brewing shares were in moderate demand and Pittsburgh preferred closed \$2 higher at 1. National Fire Proofing preferred closed ½ lower at 14½. There were no dealings in bonds.

Following is an official summary of transactions recorded on the Pittsburgh Stock Exchange on Thursday, March 11.

Oil and Gas.

Operators are giving a great deal of attention to old wells in a number of districts. In Union district, Harrison county, W. Va., the Philadelphia company has cleaned out and put to pumping in the Gordon sand an old gasser on the W. B. Maxwell 225 acres. The well is producing 15 barrels a day.

On Leading creek, Sherman district, Calhoun county, the Southern Oil company has drilled a second test on the Baker-Baughman farm through the salt sand and it is showing for a light pumper. It will be drilled through the lower sands, and if nothing is found tested in the salt sand. On Little Spring creek, Spencer district, Roane county, the South Penn Oil company has completed in the Big Injun sand No. 15 on the W. S. Craig farm. It is showing for an eight-barrel pumper. The same company has started to drill No. 16 on the same farm.

At Onella, on the Baltimore and Ohio railroad, Butler county, Pa., there is some little excitement, occasioned by Charles Helst & Co., drilling a well into the 100-foot sand that is reported to be good for 100 barrels a day. It is located in territory that was developed many years ago and not likely to open up anything new.

At the annual stockholders' meeting of the Penn-Mex Fuel company in its offices in the Peoples Natural Gas building yesterday the following directors were elected for the ensuing year: George W. Crawford, E. E. Crocker, F. W. Crawford, R. W. Cummins, P. H. Curry, J. G. Gray, F. J. Huffman and L. W. Young, Jr. At a later meeting the board of directors will elect officers, who probably will be the same as last year.

It was expected by some that an initial dividend would be declared. However, the board decided to delay the declaration of a dividend and use present available resources of the company for expansion. The doubling of its eight-inch line for light oil from Alto to the Gulf will be pushed to completion, and a new line for heavy oil will be started at once.

An absorption gasoline plant, with a capacity of 5,000 gallons of gasoline a day, will be installed in the field, and a galvanized pipe line for transporting the gasoline to the Gulf will be built.

The company will drill six wells during the year, located in defined territory. The scare that was thrown into the company a short time ago when it was reported salt water was running some of its large wells is

likely to curtail receipts. The market closed unsettled, ½ to 2½c net higher with May \$1.48½ to \$1.49 and July \$1.42½ to \$1.43. Corn finished unchanged at 45c to 46c up and provisions at gains of 12 to 30c.

Money to Loan.

The Tale of the Gold Ships. The Talk of Sudden Wealth.

Fills many a man with the idea that a shower of gold will some time descend upon him from the great unknown. He dares to suffer such an illusion of hope. He may utterly ignore the practical method of the humble plodder, who grasps the little change in order to become master of other thousands.

Some day comes the rude awakening—faith without works is not constructive.

Hope, build aircastles; but keep plugging away at the interest account—it's practical.

Eventually the filmy castles become a thing of substance—the small silver a chest of gold.

now authoritatively denied. A small amount of salt water found its way into one of its wells, but has now entirely disappeared. Unsettled political conditions in Mexico have been one of the drawbacks to development work in the Mexican fields. It is stated there is no longer any fear from that source. The government is now in full sympathy with the oil operators and promises protection to the industry.
